

Emerson makes it easy to find the right replacement motor.

A typical distribution center has hundreds of electric motors working to help the facility operate effectively and efficiently. If you take a moment to look around you, electric motors are found in almost every area and every function. Electric motors are powering the ventilation and conveyor systems and even more.

Whether you are looking for a 1/4 HP motor to power an air circulator, or a 5 HP brakemotor to operate your conveyor system, Emerson knows that there is little room for error. When it comes to your facility, having the right replacement motor available when you need it is imperative to your success. Emerson understands that when a motor is down, your facility comes to a halt. You need the ability to find the right replacement motor now!

If you are having difficulty finding a replacement fractional or integral horsepower motor, don't look any further. Emerson offers an extensive line of replacement motors, including motors for use as direct replacements for Dayton®, AO Smith®, General Electric®, Leeson®, Marathon Electric®, and many others. From 1/185 HP unit bearing motors to 4000 HP vertical hollow shaft motors, Emerson has a variety of products to meet your needs.

Emerson has the RIGHT tools available to assist you in finding the correct Emerson® motor to replace your current motor brand quickly. Find more information at www.emersonmotors.com or www.usmotors.com.
