

We prove it everyday!

Water is safe and efficient for cooling your electronics.

NEW PWS 3000 SERIES

Air to Water Heat Exchangers

NEW PWS 3000

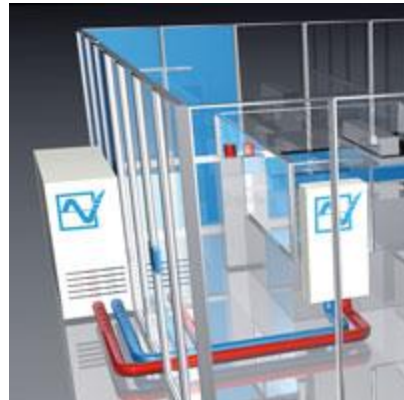

Advantage Series

Air/Water Heat Exchangers

Building on the success of its predecessor, the new PWS 3000 Advantage Series has been engineered to provide enhanced performance features:

- Matching mounting templates make our new PWS Air/Water Heat Exchangers interchangeable with the DTS 3000 cooling units.
- Physical Isolation of the water circuit components and enhanced air baffling provide the best protection of the control enclosure from water carry-over.
- An electronic thermostat for easy performance verification and temperature setting.
- Free-draining heat exchanger coil design, & manual operation of the water solenoid valve provide easy winterization.
- Sloped horizontal cover surfaces and optional NEMA Type 4X SS type rating make our PWS 3000 units perfect for wash-down applications.

CHILLED WATER COOLING SYSTEM

POPULAR SIZES AVAILABLE

Pfannenber stocks many popular sizes of cooling units and heat exchangers.
