Get Certified Faster, for a Fraction of the Cost Electrical Safety Certifications Course Now Online

During the pandemic, we've been focused on taking care of our employees, and making sure our 200+ people are working safely. We also want to help you keep your employees safe, so we are now offering our NFPA-70E/OSHA Electrical Safety courses online. We have also reduced the price to make it easier for you to send multiple employees.

NFPA-70E/OSHA Electrical Safety Training: Virtual via Zoom

**Special Price:
\$200 per student**

We are giving customers a **\$100 discount** on our in-person course rate of **\$300 per student**.

This essential class gives you the interactive instruction you need to satisfy the OSHA & NFPA 70E standard requirements. It is designed for both Qualified and Non-Qualified workers, supervisors, and safety managers.

Our instructor, Scott DeLapp, has over 40 years of experience and has mastered the principles of AC/DC electric motors, machine control panels, drives, troubleshooting of commercial and industrial rotating electrical equipment, and OSHA/NFPA70E Arc Flash Safety & Compliance.

Lunch is on us! Special Offer Expires September 30, 2020

Purchase classes for two or more employees **between now and September 30**, and each attendee will receive a \$15 e-gift card so they can lunch *and* learn!

Select the track and date that fits your needs

Our Re-Building Continues, Check Out Our Progress

We are rebuilding our facility so we can continue giving you the most efficient services available. There's been a lot of progress since last month - check out the latest!

We're closer to completion on our new, extra large operations door. This will accommodate larger capacity cranes so we can move bigger motors into the building with ease. On the right, you can see demolition of the second story to accommodate the door.

We have a lot of space for social distancing in our new training room.

Our Customers are Saying...

"Kyle and I really need to get Skeeter (Scott DeLapp) out here to perform the training we had out at G3. I really liked it and I want my guys here to have the same training."

Jonathan Lockhart, Jain Farm Fresh (Formerly G3 Enterprises)

"IEC is the best electrical outfit and motor repair company anyone will find. They never say they can't do something. Response time is the best in the industry, and our company has benefited [from working with IEC] in every way possible. Honestly I would be surprised if any other electrical company could even hold the same tool belt as IEC."

Eric Palmer, Land O'Lakes/Purina Mills

About Us

We have developed from a family owned and operated company to a trusted industry leader by working as a partner with each client. A long list of clients already know Industrial Electrical is an ally they can count on for everything from routine maintenance to emergency services, facility upgrades to top-to-bottom efficiency analysis.
